Thach Dong

- Front-end developer
- Thu Duc, HCM city
- thachdong270293@gmail.com
- 0353 860 797

◎ About me and short goals

- I have 2.5 years of experiences in front-end development, include 2 years working with Reactjs and it ecosystem libraries.
- I familiar with development tool like Scrum.
- I graduated engineering degree in non-IT field. I start learning website programming by myself, starting with Javascript and get hiring in 2019, and now for dive deep in programming paradigm I decide to extend knowledge in low level language like c#.
- Beside, I realized that English is extremely important tool for growing programming skills, so I want to join team with english communication environment (my speaking skills is not good then i think that will helpfully for improving speaking).

✳ Skills

- Problem solving.
- Teamworking.

💼 Work Experience

Front End Developer / AKADON

📅 Sep 2020 -   Current

Developing client-side projects using ReactJS, which have some features like video call, messaging, notifying, multil languages, payment with Onepay and Vnpay, time management with calendar ...

Libraries used: Reactjs, Redux-toolkits, Bootstrap, Twilio, Fullcalendar

Product sites:
https://akadon.edu.vn/
https://lms.akadon.edu.vn/ (Learning management system)

Front End Intern / Egany

📅 Dec 2019 - May 2020

Build landing pages base on ecommerce flatform like Haravan and Shopify using html, css, javascript, liquid.

🎓 Knowledge

✅ Programming languages:

- Javascript: Understanding how JS work under the hood; two pillars make js so powerful is clouse and prototypal inheritance; Lexical vs dynamic scope; Asynchronous task (callback, promise, async/await), JS design patterns: Modules, HOC, Compose, PIP.
- Typescript: a super set of JS which add some features to JS and transfer JS from dynamic type to static type language.
- C#: have basic knowledge of C#.

✅ Reactjs and Javascript base libraries:

- Familiarity with main concepts in reactjs
- Have knowledge about React ecosystem libraries like: App state management (redux-toolkits, redux-thunk, redux-saga); Working with date and calendar (momentjs, fullcalendar); Working with form (formik, react-hook-form); Multiple languages (i18next); Interact with restful api (axios); Implement PWA ...

✅ Styling and UI libraries:

- Familiarity with css, scss.
- UI libraries: i have knowledge about bootstrap (familiarity), marterial-ui, style-component.

✅ Other things: Source control with git, Agile-Scrum working flow, bitbucket, Opsgenie, figma ...
